

SINCE : 1970

Foundry Resins

Nobake Resins

Heat Cured

Gas Cured

▼ Shell Resin for Resin Coated Sand

1) Resital Series & Hardner 4920

▼ Hot Box Process

- 1) Furan Hot Box
- 2) Phenolic Hot Box

▼ Alphasert for Steel Casting :

- 1) Sinotherm 5022 : Sinotherm is a two part Binders.
- 2) Activator 3340 : Activator for Sinotherm Resin.

▼ Furan for C.I. Casting & S.G. :

- 1) GHA Fur 466, 909, 33 : Furan Resin is a two part Bindres.
- 2) Activator 100 T3 : Activator for Furan Resin.

▼ Phenolic Acid Cure for C.I. Casting, S.G., High Chrome :

- 1) Sinothrom 1214 : Sinotherm is a two part Binders.
- 2) Activator S1214 : Activator for Sinotherm Resin.

▼ Phenolic Urethane for Ferrous & Steel Casting :

- 1) Pentex 2691 : Phenolic Resin Part I.
- 2) Activator 1250 : Polymeric Isocyanate Part II.
- 3) Catalyst 1251 : Catalyst Part III.

▼ Alkyd Resin - Self Setting III Part System

▼ Cold Box System :

- 1) Gasharz 5271 : Phenolic Resin Part I
- 2) Activator 4108 : Polymeric Isocyanate Part II
- 3) Catalyst 5271 : Amine Catalyst

▼ Carbophene :

Phenolic Resin Part I & is cured by Co2 Gas

▼ Sodium Silicate Binder :

Silicate Based Binder with Collapsible Agents

Parting Agent

- ▼ Gargi Shell Parting Agent : Easy Release to the Shell Sand Mould & Cores
- ▼ Gargi Parting Agent MB : Solvent Based Parting Agent for Shell Sand Mould & Cores
- ▼ Gargi Parting Agent CB : for Easy Release to the Cold Box Sand Mould & Cores
- ▼ Gargi Garstripon AL : for Easy Release to the Nobake Binder Sand Mould & Cores

Core Joining Compound

- ▼ Garfix 8 : Cold to Cold Core & Mould Joining Compound
- ▼ Garfix 25 : Hot to Hot Shell Cores & Mould Joining Compound

Cleaning Agent

- ▼ Garclean : Cleansing Agent for Resins Deposited on Patterns

SINCE : 1970

▼ Refractory Coatings :

- 1) **Koalid RM 94 I** : Ready to use Coating Based on Graphite and Alumino Silicates.
Alcohol is used as a Carrier Liquid.
Suitable for Grey Cast, Heavy & Light Metal.
- 2) **Koalid RM 94 I Paste** : Coating Based on Graphite and Alumino Silicates.
Suitable for Grey Cast, Heavy & Light Metal.
- 3) **Koalid GW** : Ready to use Graphite Water Based Coatings.
Suitable for C.I. Castings.
- 4) **Arkopal 6172 XL (M)** : Ready to use Yellowish Coating Based on High Quality Aluminum Silicates, Iron Oxides & Water as Carrier.
Suitable for all Cast Iron Grades, Especially Automobiles Casting & can be applied on Cores Molds of Cold Box, Hot Box & Shell Resin Process.
- 5) **Zirkofluid 3256** : Ready to use Spirit Based Ceramic Zircon Coating.
Suitable for Green Sand, Sodium Silicate Bonded Sand & Chemically Cured Binder Systems for all Steel & Medium to Heavy Iron Castings.
- 6) **Zirkofluid 1275** : Ready to use Alcohol Based Zircon Coating for Flooding Applications.
Suitable for Green Sand, Sodium Silicate Bonded Sand & Chemically Cured Binder Systems for all Steel & Medium to Heavy Iron Castings.
- 7) **Zirkofluid 1219** : Ready to use Coating Material Based on Zirconium.
Suitable for all kind for Core & Molding Materials of Steel Casting.
- 8) **Zirkofluid 94 I Paste** : Coating Material Based on Zircon & in Paste Form.
Suitable for Steel Casting.
- 9) **Disopast 2357** : Ready to use Zircon Water Based High Refractory Coating.
Suitable for Steel Casting.
